ROADSIDE EMISSION SURVEY CONSUMER INFORMATION SHEET

Why is the Bureau of Automotive Repair (BAR) inspecting my vehicle?

BAR staff are inspecting your vehicle today to gather vehicle emissions data for the State of California. The data collected is only used to evaluate and improve the performance of California's emissions reduction program. There are no consequences to you for participating in roadside testing, regardless of the condition of your vehicle's emission control equipment or its emission levels. Your cooperation in this survey is important and very helpful to the State of California.

How long will the inspection take?

The inspection should take approximately 10 minutes. Your patience is appreciated.

Does this take the place of a required Smog Check inspection?

No. We will provide you with a copy of the Vehicle Inspection Report (VIR) detailing the results of the test. This report may **not** be substituted for a vehicle's official Smog Check inspection report; however, the VIR does provide important information about your vehicle. We will also alert you to any other mechanical issues we observe while conducting the inspection.

Where can I find additional information on the Roadside Emission Survey?

For additional information regarding the roadside emission survey, please call BAR's toll-free number at 800.952.5210 or visit our Web site at www.smogcheck.ca.gov.

Thank you for your participation in the Roadside Emission Survey!
